

الْحَمْدُ لِلَّهِ

CONGRATS!

2nd Place - Grades 1-5

Student Name
Mohammad Jarallah
School
The Huda Academy
School City & State
Little Rock, AR
Grade
5th

You might not survive the night. You don't know what'll happen. You do not have food. What'll you do?

The biggest challenge on Earth is world hunger. After wars there are a lot of people who are starving. Most people die from undernourishment. The after war effects are a lot of hungry people and this happens in places like: India, Yemen, Palestine, Syria, Iraq, etc. The following happened in between 2014- 2016: In a world where we produce enough food for everyone, 795 million people or one in nine still go to bed on an empty stomach. I'll solve this by following our Prophet (PBUH) and what he said. He said anyone who sleeps with his stomach full and his neighbor is hungry is not a believer. I'll make sure my neighbor will sleep on a full stomach. Anyone can make a difference in this world if they have a wild imagination and if they can be inspired. Do you know why? It's because everyone is a human like me and anyone can make a big difference.
